

# 2013 Keep Our Waters Clean Questionnaire

Thank you for taking your time to answer the questions below. Your input will help us work toward improving environmental education in California.

Date: \_\_\_\_\_ Location where you received the boater kit and questionnaire: \_\_\_\_\_  
(event/location name & city)

1. From whom did you receive the boater kit?

- Marina/Yacht club operator
- Dockwalker/Volunteer/Staff
- Other (specify): \_\_\_\_\_

2. How long have you been boating? \_\_\_\_year(s) or \_\_\_\_months

3. What is your 5-digit home zip code? \_\_\_\_\_

4. What type of boat(s) do you currently own?

- Ski boat/Run-about
- Cuddy cabin/Cruiser
- Fishing boat
- Motor yacht
- House boat
- Off-shore racer (cigarette boat)
- Sailboat with auxiliary motor
- Sailboat without auxiliary motor
- Personal watercraft (jet-ski)
- Other (specify): \_\_\_\_\_

5. What type of toilet is on your boat?

- Installed toilet (**Go to question 6**)
- Port-a-potty (**Skip to question 7**)
- No toilet on board (**Skip to question 7**)

6. In the past year, when using a sewage pump-out station, how often...

- a.  Not Applicable, I use a mobile pump-out service (**Skip to question 7**)
- |                                |                          |                          |                          |                          |                          |
|--------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
|                                | Never                    | Rarely                   | Half the Time            | Most Often               | Always                   |
| b. Is it broken?               | <input type="checkbox"/> |
| c. Is it closed?               | <input type="checkbox"/> |
| d. Do you wait in line?        | <input type="checkbox"/> |
| e. Are you unable to find one? | <input type="checkbox"/> |
- f.  Never use the installed toilet on my boat.

7. Did you know this logo represents a location where you can drop off used motor oil?

- YES
- No, but now I do!

8. Did you know this logo represents a location where you can safely pump-out your boat sewage?

- YES
- No, but now I do!

9. Which of the following may happen to those who discharge untreated boat sewage overboard in California?

- Nothing - It is discouraged but not against the law
- Fine up to \$1100
- Fine up to \$2000
- Up to 6 months in jail
- Don't know

10. Which of the following may happen to those who discharge fuel, oil, oily wastes and hazardous substances into or upon navigable waters of the U.S.?

- Nothing - It is discouraged but not against the law
- Fine of up to \$10,000.
- Violators are liable for the cost of the cleanup and are subject to the substantial civil and/or criminal penalties
- One to 15 years imprisonment
- Don't know

11. It is illegal to use soaps or other dispersing agents to dissipate and/or mask oil on the water or in the bilge.

- TRUE
- FALSE

12. It is illegal to dump any garbage into the navigable waters of the State, including inland waters and up to three miles from shore.

- TRUE
- FALSE

Thank you for your time, now you are ready to take the pledge for healthier waterways and to keep boating good, clean and fun!

Please See Reverse

**Pledge to Keep Our Waters Clean: Please read and check the box next to each clean boating habit you will implement this year. Let's keep boating clean and fun.**

**I pledge to:**

- Go green when I clean. Use less toxic, biodegradable, and phosphate free cleaning products.
- Never use soaps to remove any oil or sheen on the water.
- Stash trash onboard, recycle, use reusable water bottles, coffee mugs and bags and avoid excess packaging.
- Dispose of hazardous wastes (e.g. used oil, oil filters, oil/fuel-saturated absorbents, batteries, and antifreeze) properly at a local Household Hazardous Waste Collection Center.
- Never discharge raw sewage overboard. Instead I will always use a landside restroom, sewage pumpout, port-a-potty dump station, or mobile service.
- Contain every drop. Leave the fuel tank 10% empty, use oil absorbents in the bilge, under the engine, and while fueling to capture unexpected leaks.
- Review and implement the practices included in the educational materials found in my new Clean Boating Kit.

FOLD HERE

- YES! I would like to receive clean boating information in the future.**
