

BILGE OIL

FACT:

Ninety percent of oil in marine waters is from small, chronic sources such as bilges, outboard motors, poor fueling procedures, urban run-off and improper disposal of used oil products.

GOAL:

Protect California's waterways by preventing oily bilge water from being pumped overboard.

To report all oil fuel and chemical spills in California call both the National Response Center (800) 424-8802 and the State Line (800) OILS911 (645-7911).
