

## ACTIONS YOU CAN TAKE TO PREVENT OIL AND GAS SPILLS

- Use caution when filling your fuel tank and don't top off. Know the capacity of your tank and leave it at least 10% empty.
- Catch fuel drips with an absorbent pad. Properly dispose of soiled absorbents at a hazardous waste disposal location.
- Do not hose down gas spills, or apply detergents or soaps to an oil sheen.
- Install fuel tank vent whistles or fuel/air separators to avoid spills.
- Inspect fuel lines and hoses periodically. Replace as needed.
- Use funnels for pouring oil and keep a supply of absorbent pads onboard for cleaning up spills.
- Dispose of used oil and drained oil filters at a waste oil recycling center.
- If a spill occurs, notify the marina management immediately. All oil and chemical spills must also be reported to the National Response Center (800) 424-8802 and the State Line (800) OILS911 (645-7911).
